Winning Postcard: Georgina Kenton

Dear Georgina (2011)

Rushden is split into two halves. There is a noisy and polluted side and a peaceful and quiet side.

The noisy and polluted side is the busy side of Rushden. It has a factory which is why it is polluted. Everyone now travels by pods around the town. Rushden and Diamonds are now in the premier league. The train station is now also running again

The other side is a animal sanctuary. Due to climate change Rushden can now have animals such as Elephants. There is a flowerfield which you can visit. Everyone gets around by walk paths.

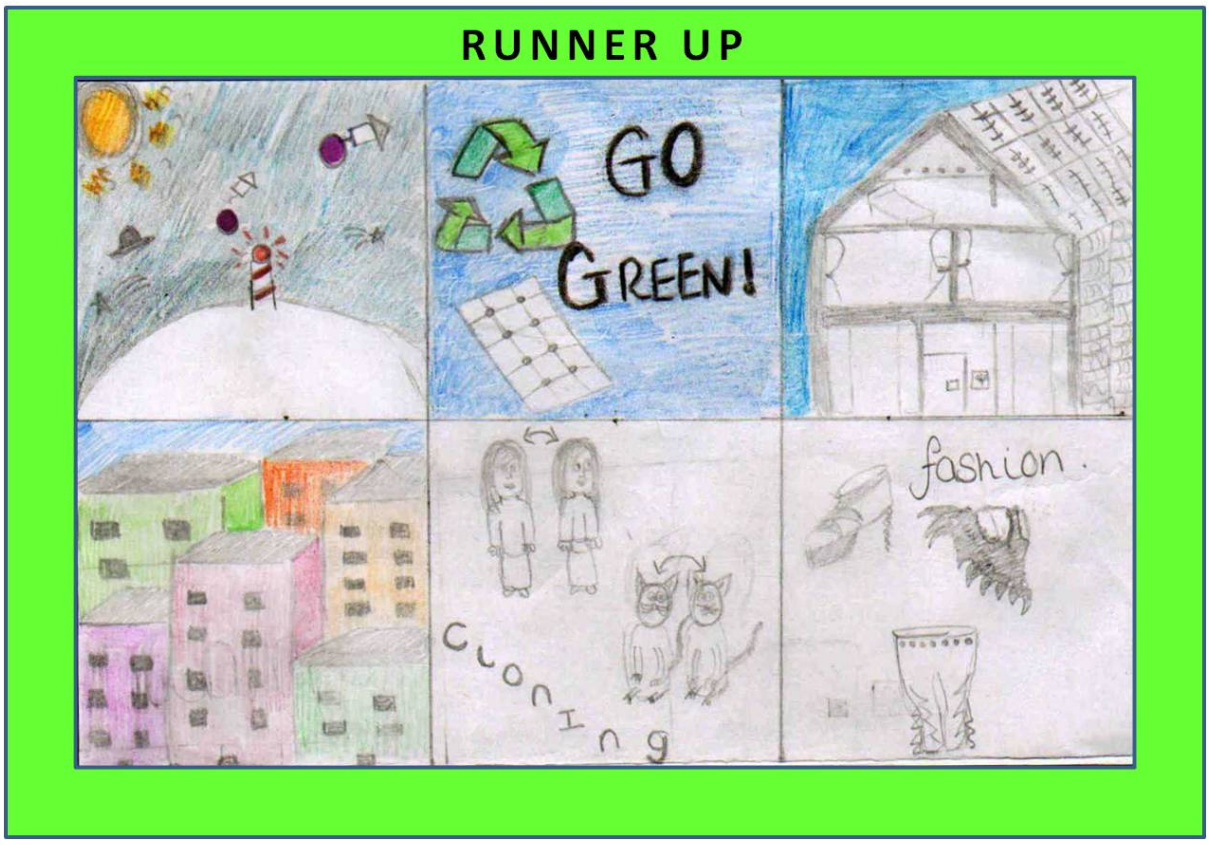

I hope you would enjoy 2031.

Ellie Nelson-Coles

Hello,

It is kind of weird to write to myself. I don't really want to tell you much about me, it will spoil your future. All I will tell you is I have a great life, one that you will enjoy very much. I have a husband, a 5 year old daughter and a really cute dog. I still live in Rushden but I do not live in the same house and the house I live in now is very spacious and pretty. The houses now are so different and advanced as well. The final thing that I will tell you about myself is I have a very good and well paid job that I really enjoy and you will too.

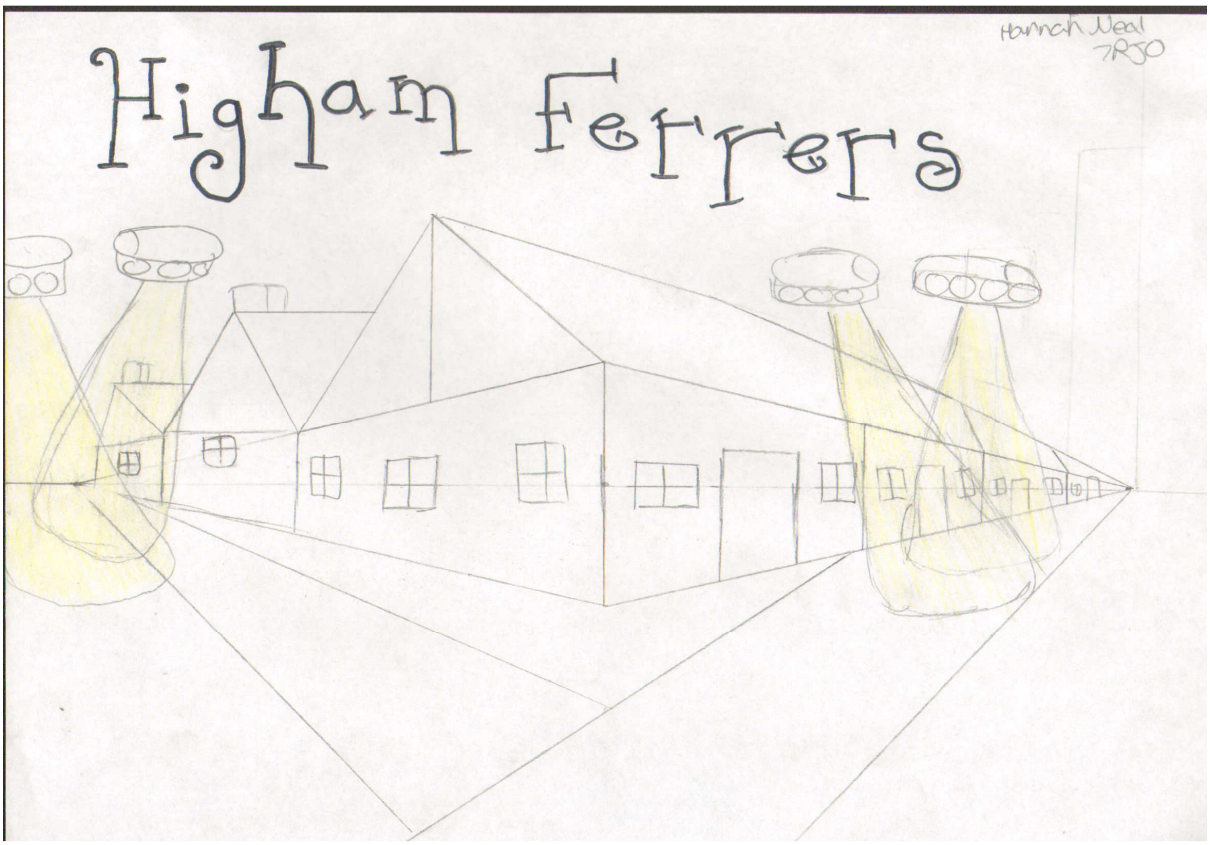

Ok, so enough about me, I will now tell you a bit about Rushden and Higham. They have both grown lots and now they are very important towns. There are also many more great shops that you would love. A holiday resort has been built at Rushden lakes with lots of water activities and even more shops. It's great!

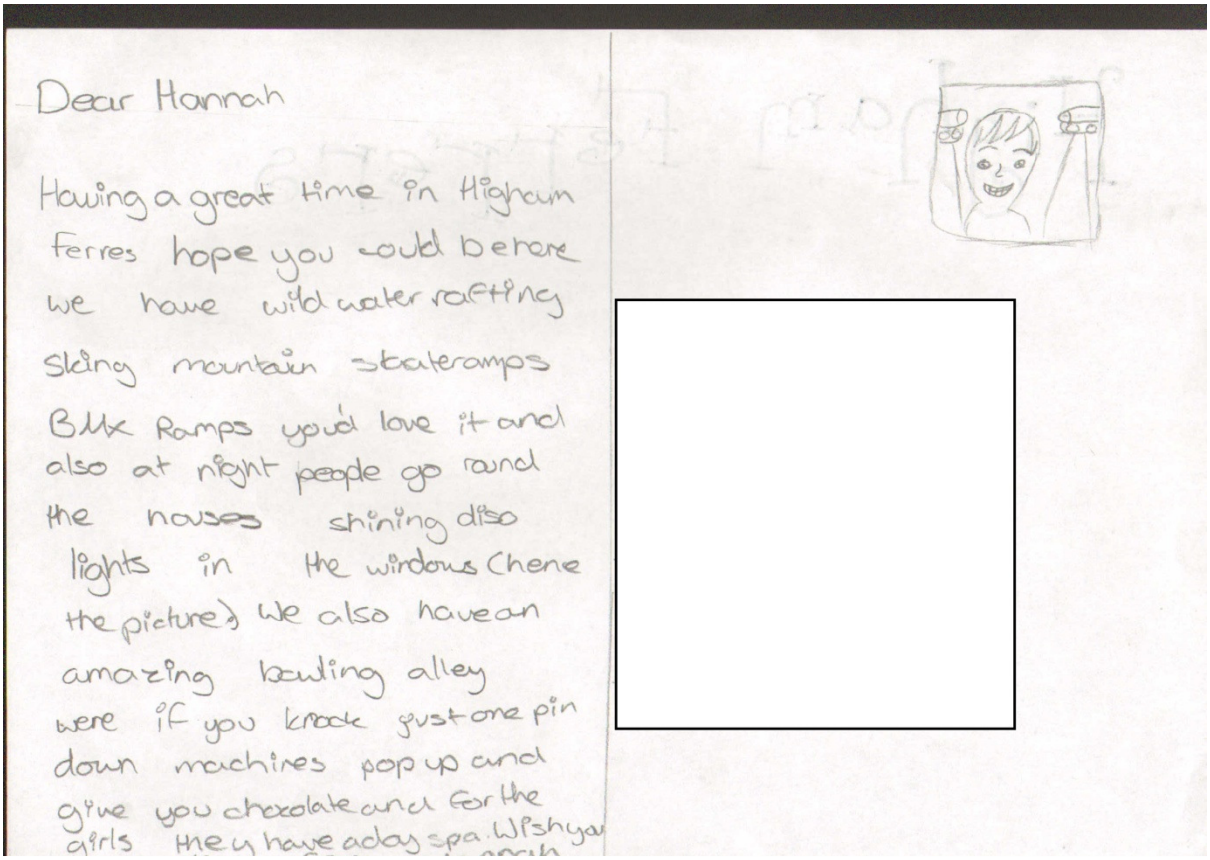

There are also so many more gadgets and things these days as well. I remember the time when I used to think that the mobiles you have now were great. Now they are so amazing and advanced. You just attach this tiny thing to a pocket or something and you just speak into it and it does whatever it wants you to do. I'm on it at the moment actually and when I have finished telling it what to write, it will be sent off to a special base where some computers print it on to paper and post it to anywhere in the past or future.

Another thing that has changed greatly is money. Now, £5s is the lowest currency you can yet, it's like 1p! Cash doesn't exist anymore and it is all done on flash cards (which is basically an updated credit card).

The last thing I will tell you before I have to go is about the coast. You know now, they keep gong on about rising sea levels? Well they were right. Now half of London is water and it is not slowing down! Soon we will be by the coast. That's actually quite worrying if you thing about it as soon there will be no England left.

Hello me,
Well a lot has changed since 2011. But be prepared for what is yet to come, and you'll find the future has a lot to offer you. (2031) Some things may effect your whole life forever, and some things won't change anything about your or your surroundings. So enjoy everything while it lasts, and I'll see you in the near future;
In 2020, our community decided that we used technical transport way too much, and we weren't keeping healthy because of it, so we put into order a schedule for using un-necessary and necessary transports. Four days a week are car, truck and van days, two days are train, bike and motorbike days, and the last day, we have an only walking day. This schedule varies every week.
As we were very concerned with the peoples health, in 2028, we transformed Northampton into the healthiest town in the world, and it is now law that we have to eat five fruit and vegetables a day, do an hour of exercise everyday and can only watch television for seven hours every two days!
We were also concerned about the lack of fossil fuels and energy sources we had left, so in 2030, we started to use wind turbines and solar panels on most things as much as we could. We hope this energy saving community will stay as it is, or progress to a better future, and I will see [illegible]

Dear Luciee (2011)

I am currently in my livingroom awaiting my message from the Prime minister to tell me about the new technology we have to bring elvis back to life, my hologram messenger is broken so I am using my neighbours.
I thought I would quickly write you a message telling you about me and my life in the future. I am currently living in my modern technilogical home with my family, my two kids Rosie and Libertii mae plus my Husband, dylon and me and dylon are currently expecting a little tipper tapper of feet, I am very proud.

Unfortunatly, our country is approaching a war zone at this current moment in time with Russia as the Russians have bombed london, Global warming is reaching its highest Point and sea levels have risen, the good news is that diseases have gone! THEY CURED CANCER, turns out they just need to cold one of the hairs?
Foshion is totally different people are wearing pencils and Pineapple?. Buildings are all funny shapes now, circles, Squares and HEXAGONS!
I better keep this message short as I have alot to do and my hologram messenger is recieving the Prime minister, ENJOY 2011 KID! take care!

From the future you! ♡

Luciee ♡
x

P.S When you get to 2031 take Rosey and Libertii to Frankbo's they love it! buy them the toy car they want otherwise they [illegible]
